LEGEND Displays labels and symbols for visible layers in the map.

SELECT

Interactively select features on the map and take actions on the selection.

The screenshot illustrates the 'Select' feature in a map application. On the left, a sidebar titled 'Select' contains a green 'Select' button, a 'Clear' button, and a dropdown menu with options: 'Select by rectangle', 'Select by polygon' (which is highlighted with a blue arrow), 'Select by circle', 'LHIN Regions', and 'LHIN Subregions'. A large text overlay 'CHOOSE SELECTION METHOD' is positioned over the sidebar. The main map area shows a geographic region with various colored polygons (orange, brown, yellow) and blue outlines. A blue rectangular selection box is overlaid on the map. A tooltip says 'Press down to start and let go to finish'. To the right, a vertical 'Layer' panel lists several layers: Hospitals (checked), Community Health Centres, LHIN Regions, LHIN Subregions, Wards, Neighbourhoods, Major Roads and Highways, Parks, Age-standardized Persons in Low Income Areas (checked), Age-standardized Persons in High Income Areas, Persons in Low Income Areas, Persons in High Income Areas, Create layer, Add a marker, Save to My Content, View in Attribute Table, and Clear selection. A callout 'CLICK MORE OPTIONS FOR ADDITIONAL ACTIONS' points to the three-dot menu icon at the top of the layer list. The bottom of the map interface includes a copyright notice: 'York University, City of Brampton, Government of Ontario Base Map, Province ...' and the Esri logo.

QUERY Retrieve information by executing a predefined query. Take actions on the queried features. A new layer is also created in the layer list.
