

# High Cost Health Care Users: A Focus on Health Links

**Presenter: Richard Glazier, MD, MPH**

**Team: Mohammad Agha, PhD**

**Marisa Creatore, PhD**

**Peter Gozdyra, MA**

# Agenda

1. Introduce the Objectives of the High Health Care Users Analyses
2. Methodological Notes
3. Who are the High Cost Health Care Users?
4. Where do they Live?
5. What Contributes to the High Cost?
6. Discussion

# Objectives

The aims of this research are to:

- 1) Describe the cost of health care services by geography and by sector
- 2) To identify characteristics of patients with high resource use, within the 9 Toronto Central LHIN Health Links and overall
- 3) Describe the geographic distribution of the residence of patients with high resource use in the TC LHIN

# Methodological Notes: Data

**Macro to generate cost estimates *per person per year* includes:**

- Inpatient
- Day surgery
- Emergency
- Inpatient mental health
- Inpatient rehabilitation
- Complex continuing care (CCC)
- Home care
- Long-term care (LTC)
- Dialysis clinics
- Oncology clinics
- OHIP Physician Billings
- OHIP Lab Billings (L-codes)
- OHIP Non-Physician Billings (e.g. physiotherapists, optometrists, chiropractors)
- Capitation (FHO/FHN)
- Ontario drug benefits
- Assistive devices program

# **Methodological Notes: Definition of 'High Cost User'**

- **'High Cost Users' are the 1%, 2 – 5%, and 5% of patients in Ontario with the highest combined expenditure for health care (based on previous data) in 2010**
- **From each of the above groups, the TC LHIN residents that were high cost users were identified**

# Results: What does it mean to be a high health care cost users?

Population	Total Cost	% of total population	Cost/ person
Total Population	\$2,959,130,759	100.0%	\$2,474
1% High Users	\$1,143,141,381	38.6%	\$85,809
5% High Users	\$2,008,662,861	67.9%	\$33,483
2-5% High Users	\$865,521,480	29.2%	\$18,546

# Results: Who are the high health care cost users?

Age Groups	Population Distribution among top 1% high cost users in TC LHIN	Ontario Population Distribution
<20	2.8 %	24.0 %
20-44	8.8 %	34.9 %
45-64	18.5 %	27.3 %
65-84	41.8 %	11.9 %
85+	28.1 %	1.9 %
Total	100%	100%

# Results: Who are the high health care cost users?

Year of Death*	Percent of top 1% high cost users in TC LHIN who died
Year 1	16.4 %
Year 2	15.0 %
Year 3	10.1 %
3-year Total	41.4 %

\*Year of death in relation to baseline when 'high user' status was defined.

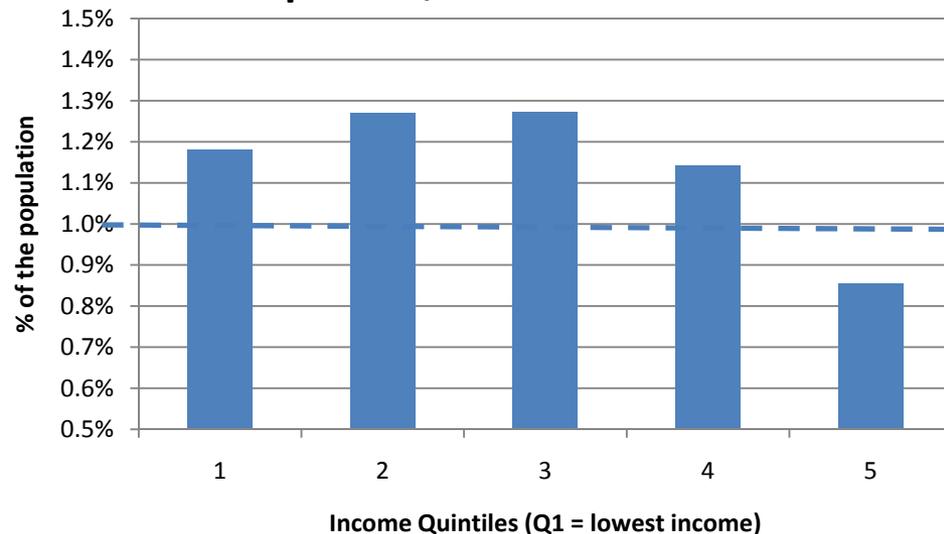

# Results: Who are the high health care cost users?

**Among the top 1% of high cost users:**

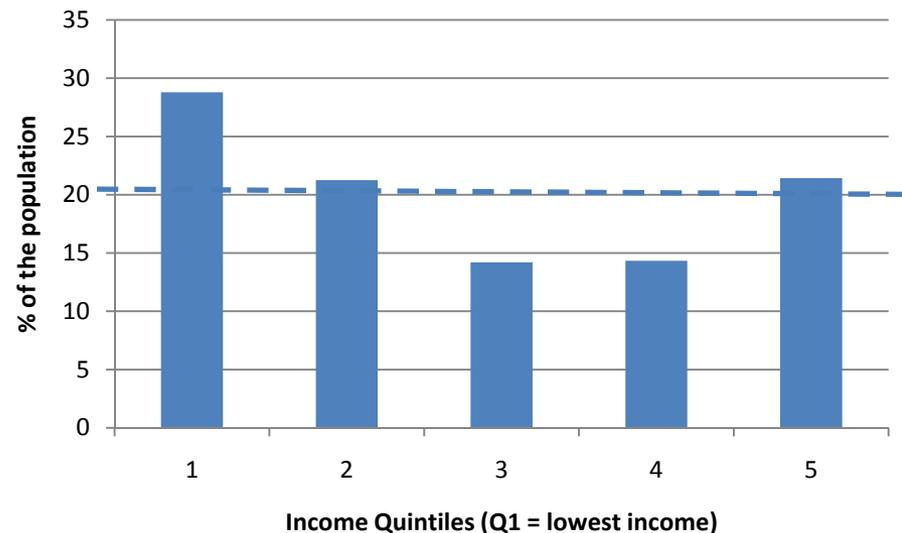

- **~ 43% of high cost users die within 3 years (acute high cost users)**
- **~ 33% survive and are no longer high users after 3 years**
- **~ 24% of high cost users are chronic high cost users**

# Results: Who are the high health care cost users?

**% of the population that are Ontario top 1% high cost users by income quintile, TC LHIN 2010**

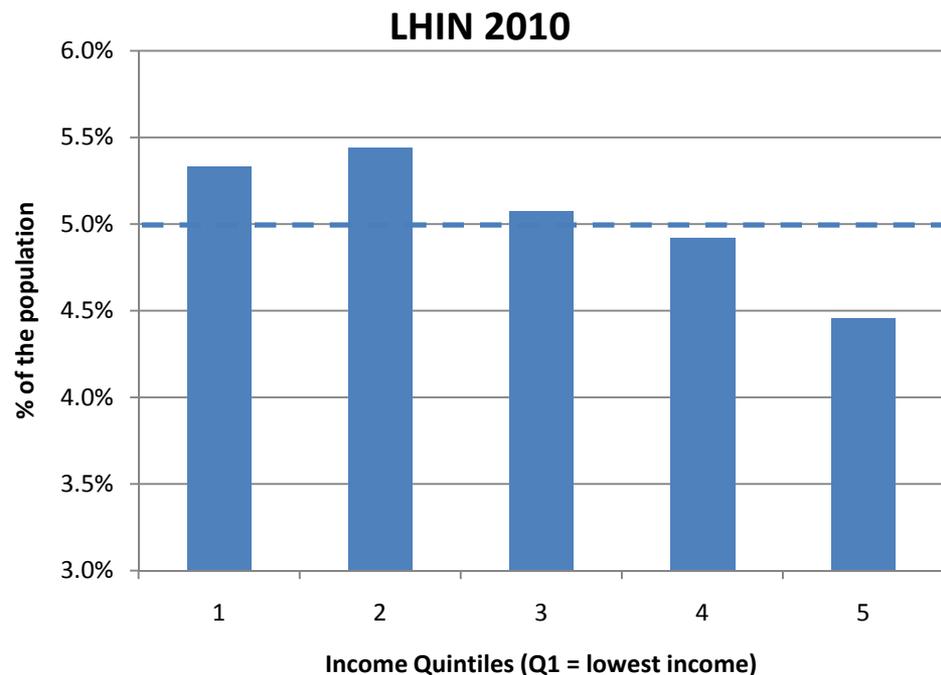

**Distribution of top 1% high cost users in the TC LHIN by income quintile, 2010**

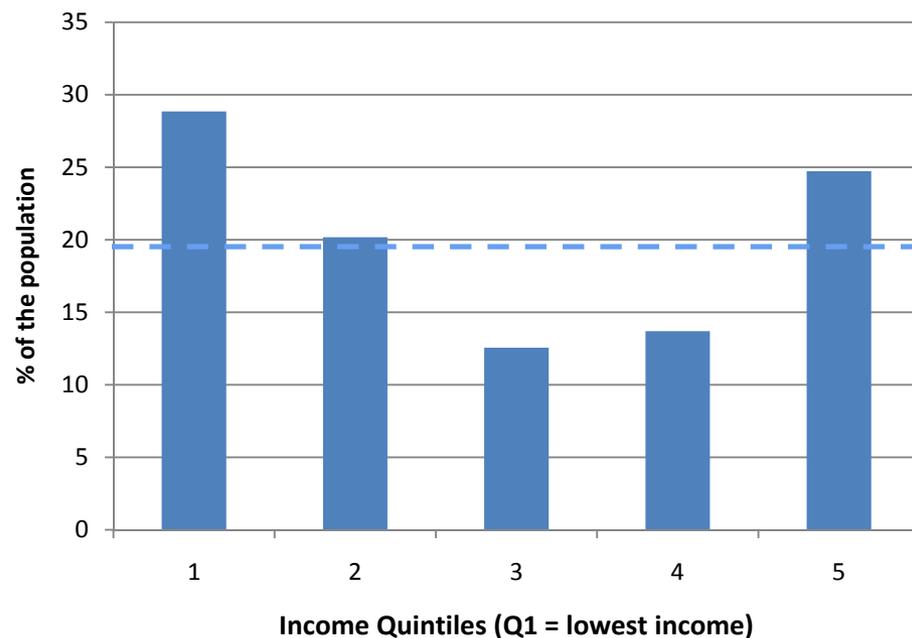

# Results: Who are the high health care cost users?

**% of the population that are Ontario top 5% high cost users by income quintile, TC LHIN 2010**

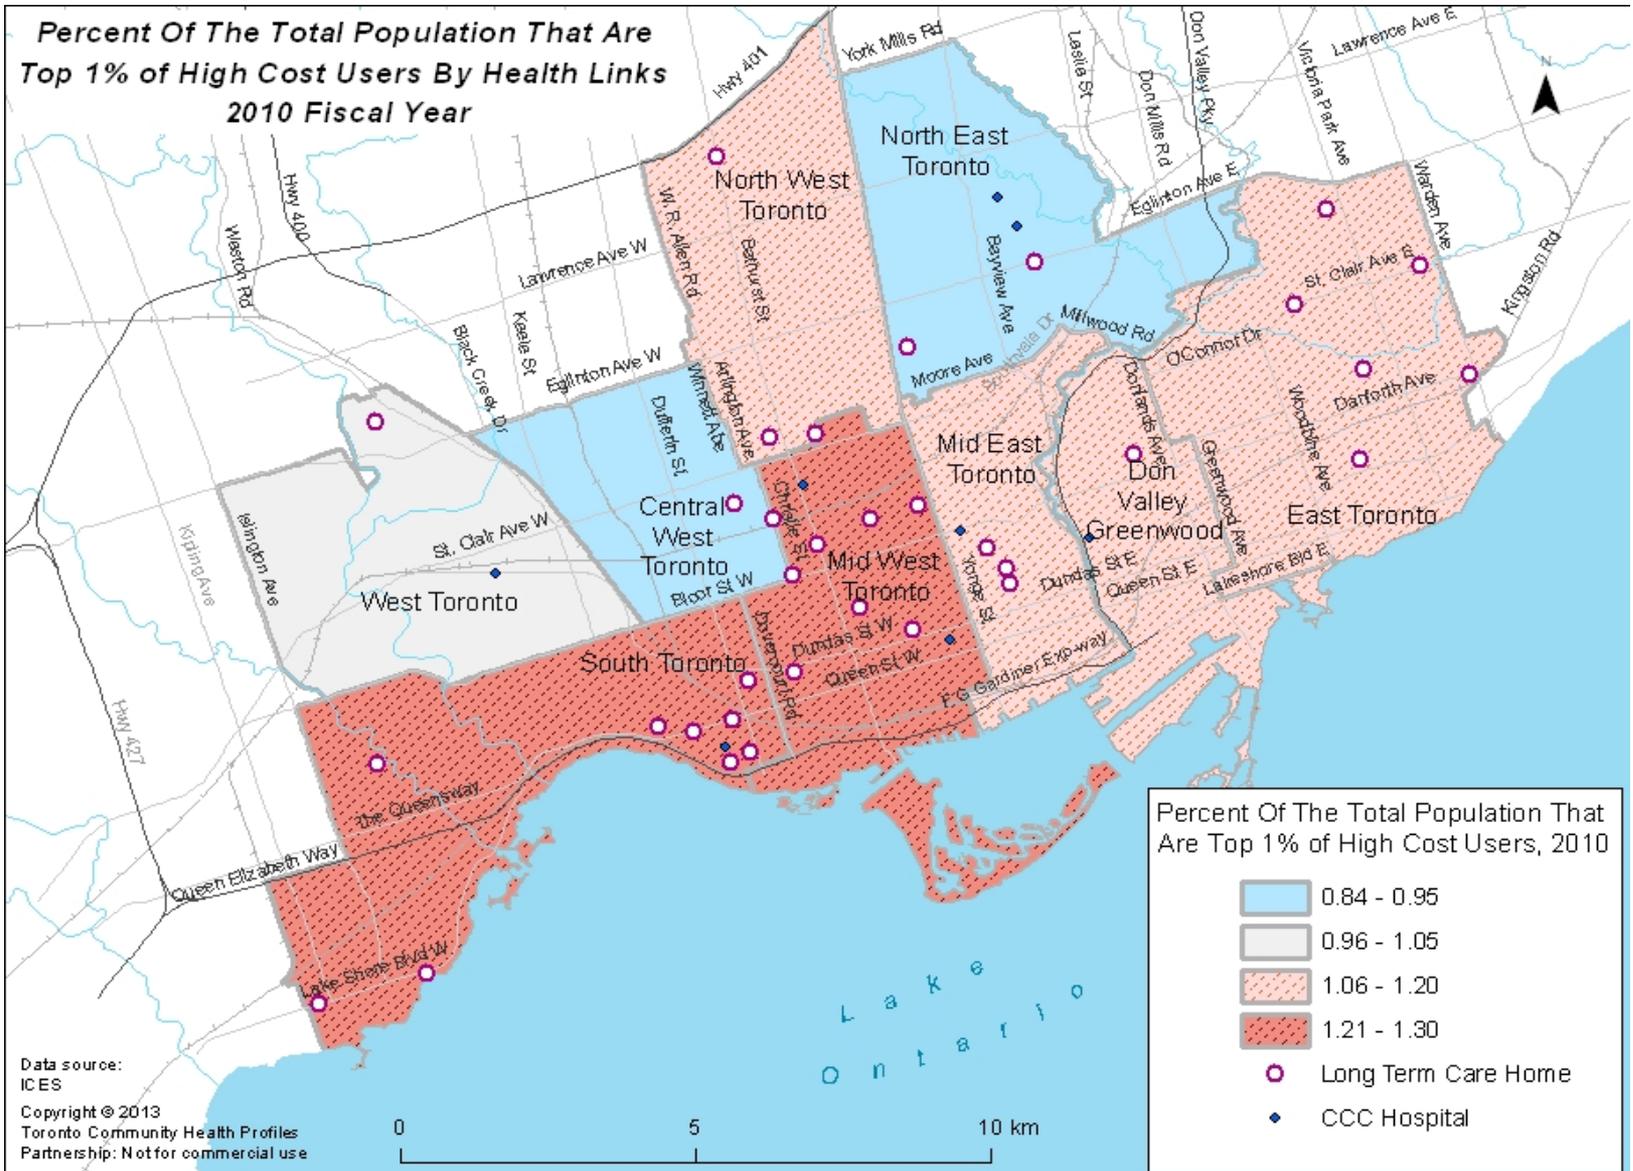

**Distribution of top 5% high cost users in the TC LHIN by income quintile, 2010**

# Results: Where do high health care cost users live?

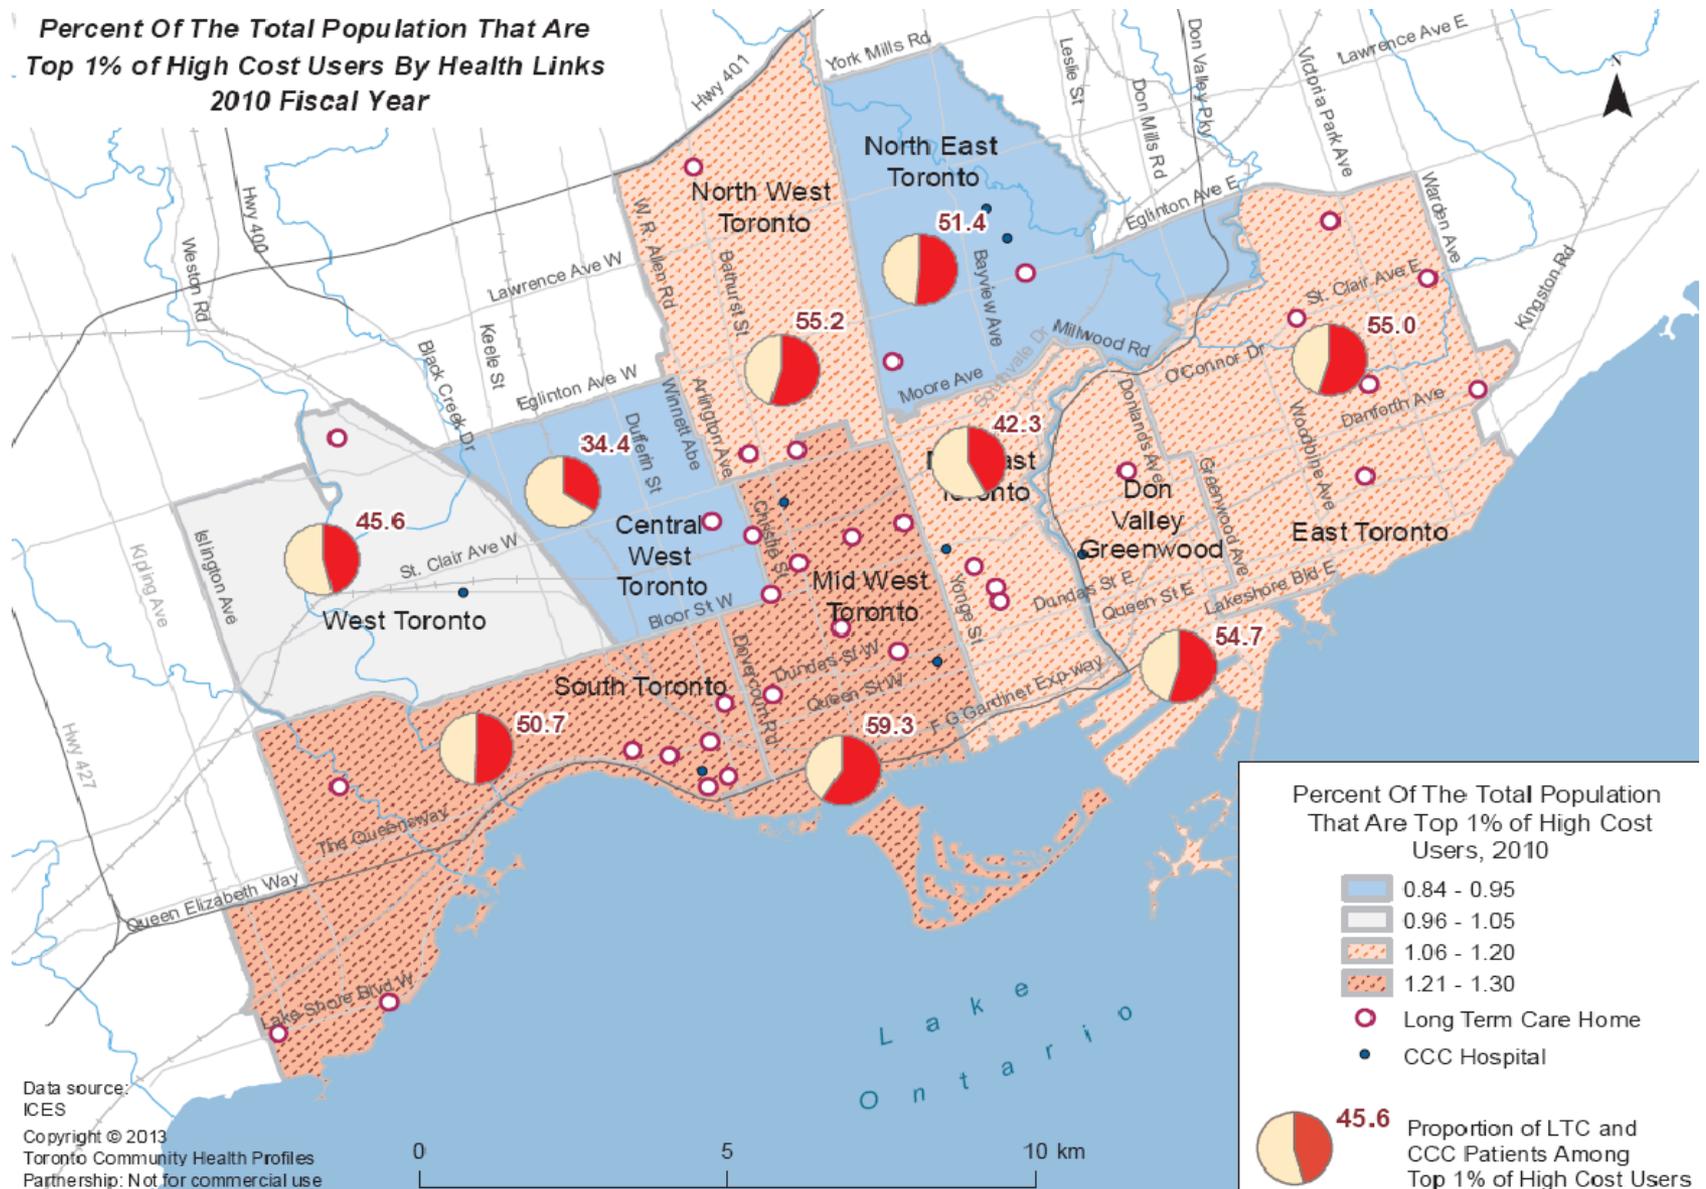

Health Link	Total Population	1% High Cost Users	5% High Cost Users
Central West Toronto	116,650	1,029	5,601
Don Valley Greenwood	81,896	879	3,888
East Toronto	177,411	2,071	9,172
Mid East Toronto	130,273	1,515	7,507
Mid West Toronto	174,447	2,270	8,593
North East Toronto	123,180	1,035	5,221
North West Toronto	127,458	1,434	6,553
South Toronto	148,558	1,878	7,894
West Toronto	116,773	1,197	5,510
Total	1,196,646	13,308	59,939

# Results: Where do high health care cost users live?

# Results: Where do high health care cost users live?

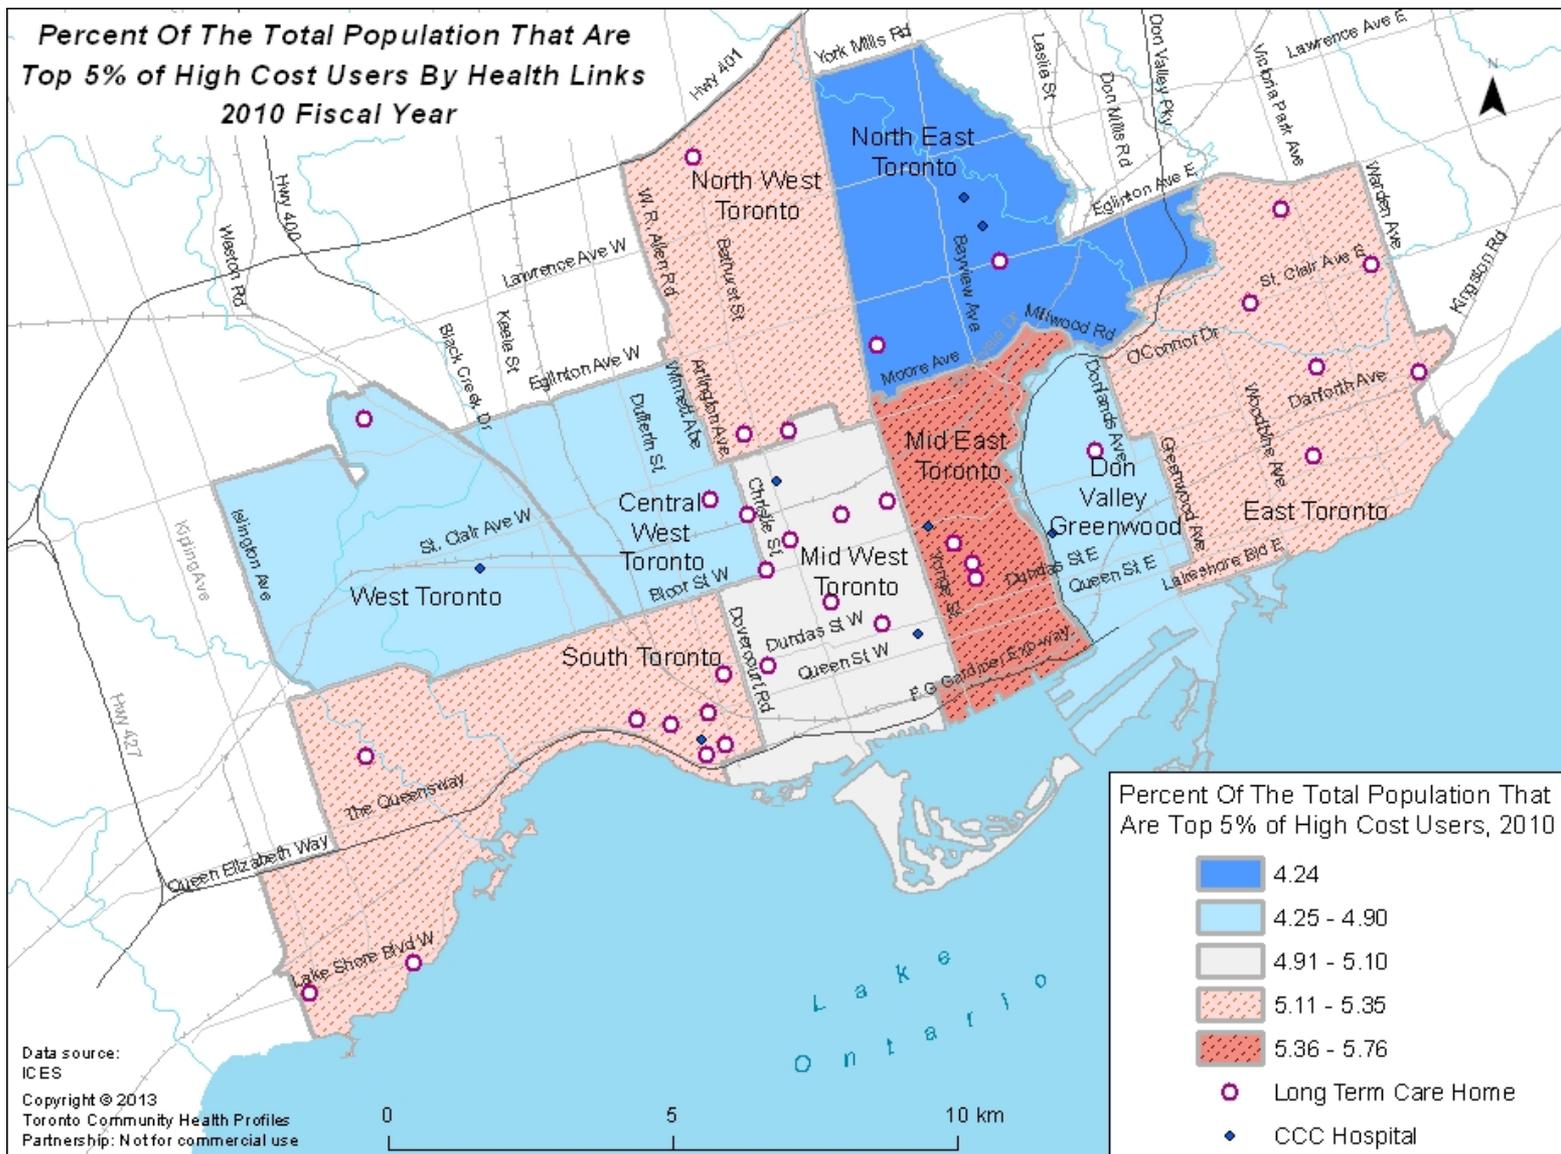

Percent Of The Total Population That Are Top 1% of High Cost Users By Health Links  
2010 Fiscal Year

# Results: Where do high health care cost users live?

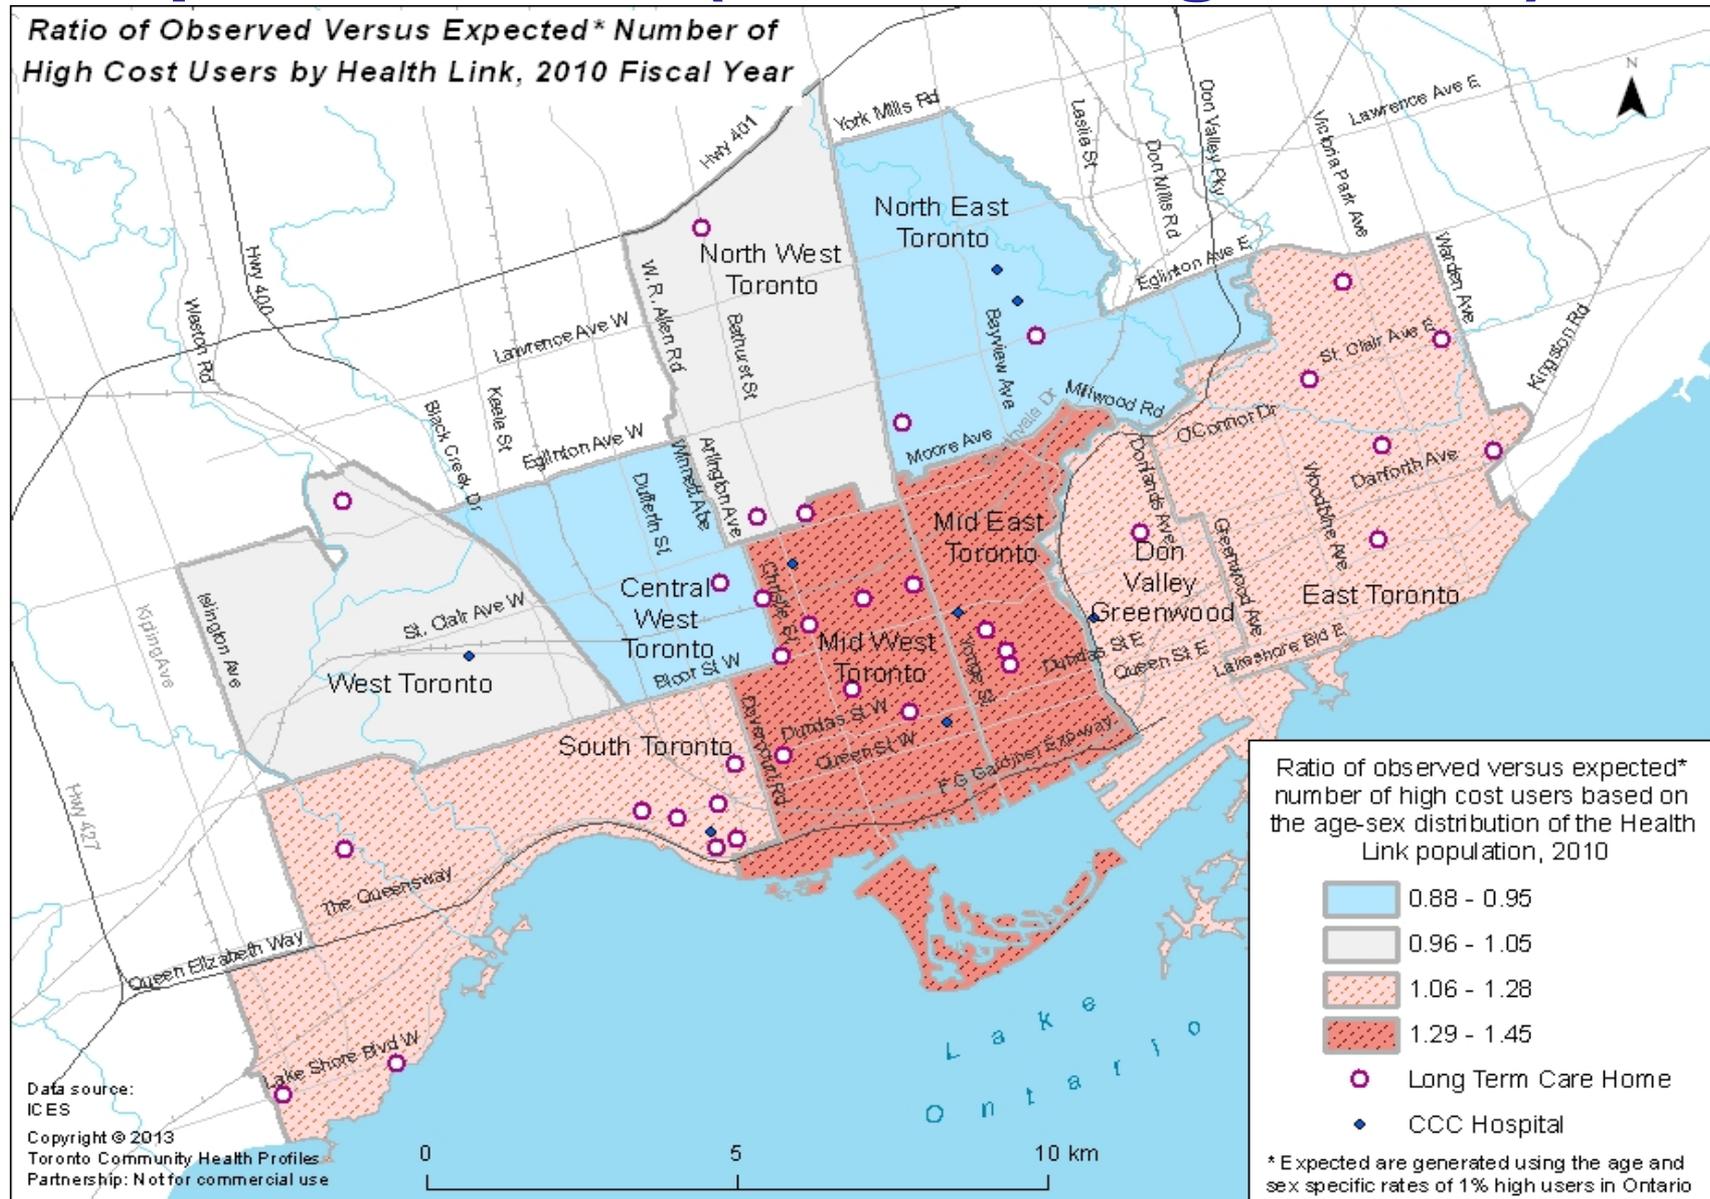

# Results: Where do high health care cost users live?

Percent Of The Total Population That Are Top 5% of High Cost Users By Health Links  
2010 Fiscal Year

# Where are the areas with higher than expected rates (based on age & sex)?

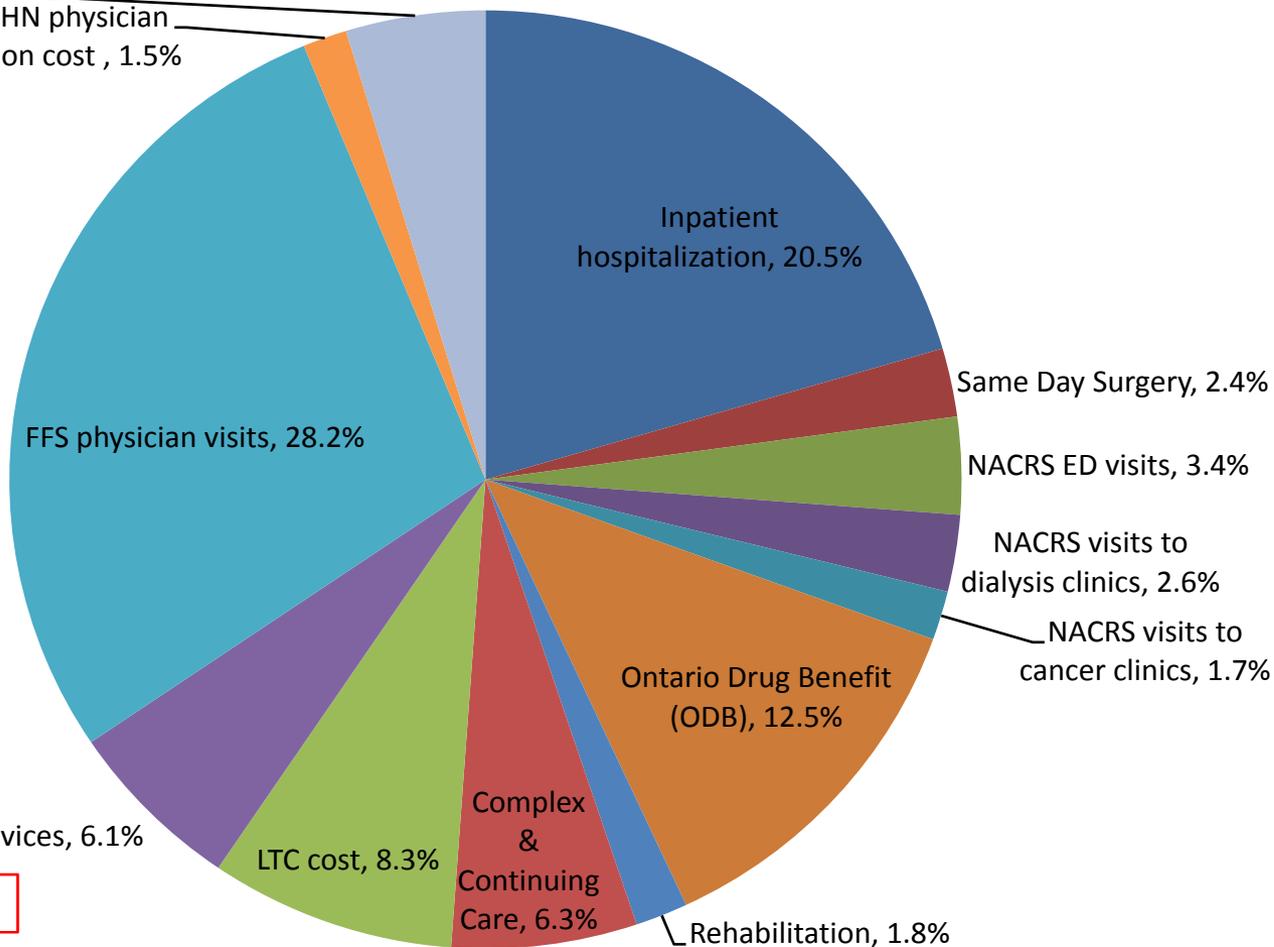

# Results: What are the cost drivers?

**Distribution of health care costs, total population, TC LHIN 2010**

OMHRS  
admissions to  
designated  
mental health  
beds, 4.7%

FHO/FHN physician  
capitation cost , 1.5%

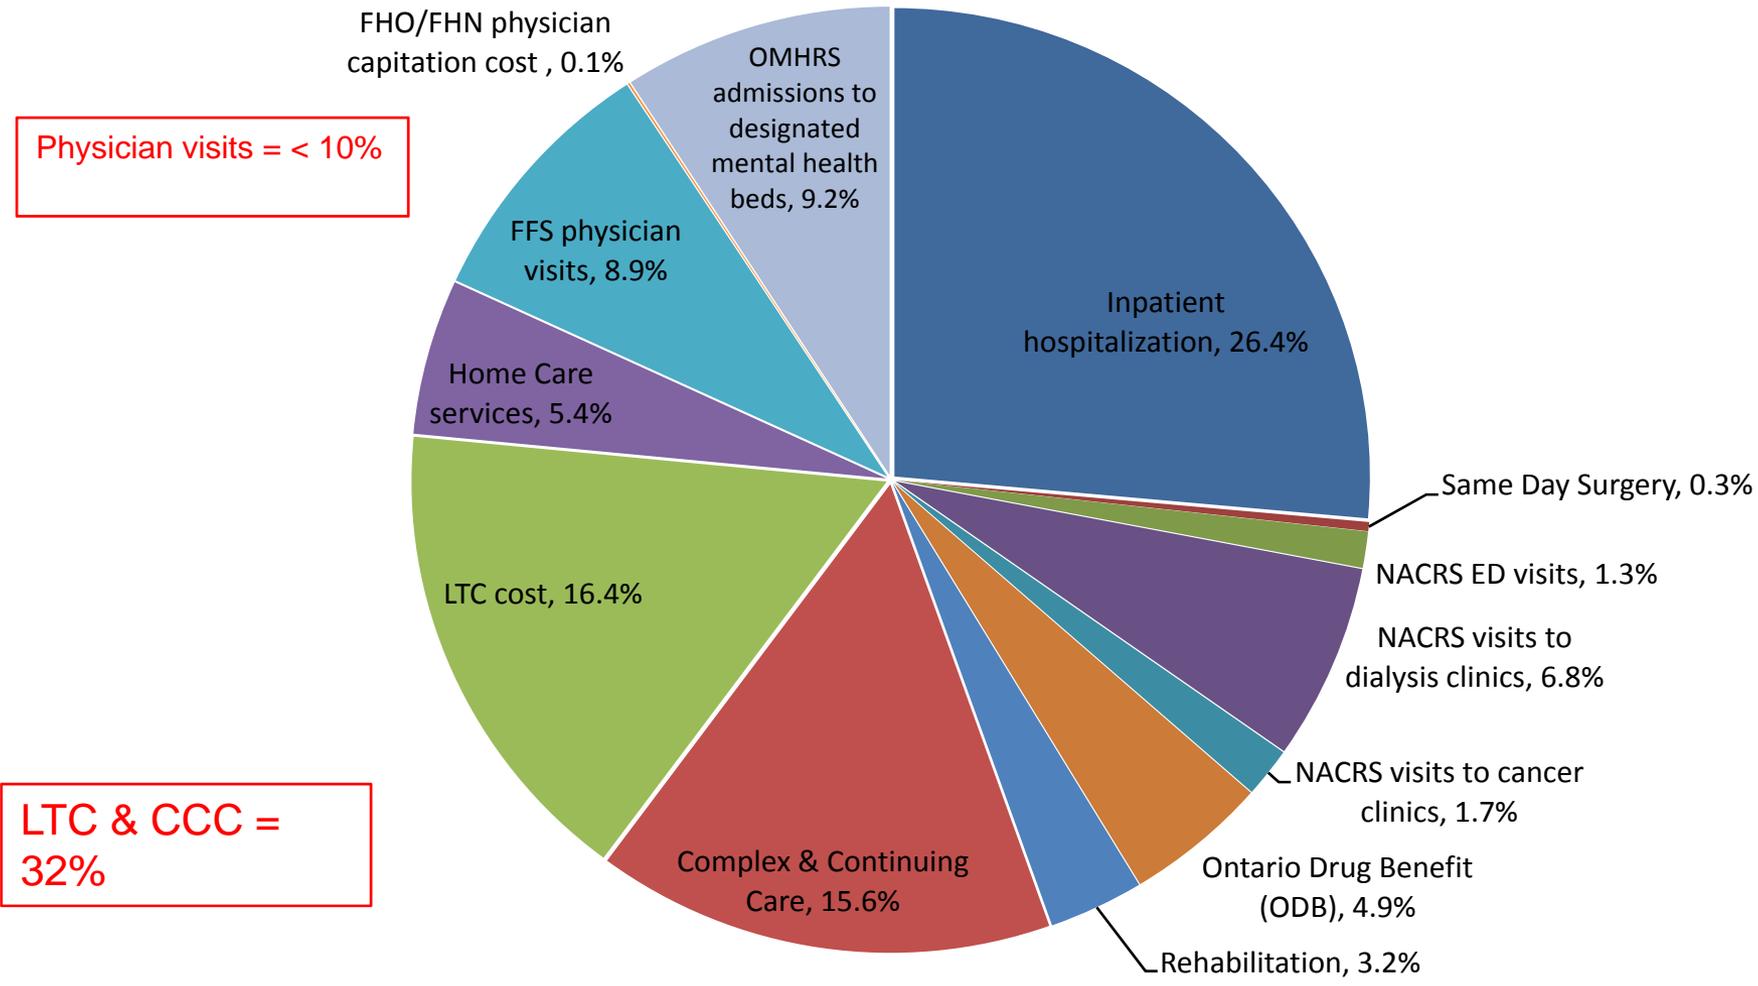

Physician visits = ~30 %

LTC & CCC = 14.6%

# Results: What are the cost drivers?

Distribution of health care costs among top 1% high cost users, TC LHIN 2010

# Results: What are the cost drivers?

Chronic Condition	Prevalence among top 1% high cost users in TC LHIN	Prevalence among top 5% high cost users in TC LHIN	Prevalence among total TC LHIN population	Prevalence among total Ontario population
Hypertension	72.3%	60.6%	19.2%	21.9%
Diabetes	39.2%	31.2%	8.4%	9.5%
COPD	33.7%	26.1%	5.9%	6.6%
CHF	28.1%	16.6%	1.8%	2.1%
Cancer	25.7%	22.3%	3.9%	4.1%
Asthma	18.9%	20.4%	13.6%	14.4%
Mental Health	15.4%	20.7%	9.9%	9.0%
MI	8.5%	6.3%	0.9%	1.3%
Total Population	13,322	59,991	1,195,899	13,639,380

# Discussion: What can this data tell us? What does this mean?

- **Acute care still accounts for the majority of spending, particularly among high cost patients.**
- **LTC/CCC costs are a significant proportion of total costs in this populations**
- **~ 43% of high cost users die within 3 years (acute high cost users)**
- **~ 24% of high cost users are chronic high cost users**
