CI Confidence Interval; LL = Lower Limit; UL = Upper Limit

H / L / NS Chances are at least 19 in 20 that the rate is higher (H) or lower (L) than the City of Toronto rate (p < 0.05). Rates marked not significantly (NS) different do not reach this level of significance.

* **Rates based on fewer than 20 events are likely to be unstable.**
Reporting with caution if numerator contains 6-19 events OR denominator contains 6-29.

** Rate ratios were created by dividing the local area rate by the City of Toronto aggregate rate.

Demographics - Denominator: Based on 2011 Census population estimates. (Statistics Canada, 2011 Census of Population)

All unscheduled ED visits 2014/15. Data source: National Ambulatory Care Reporting System (NACRS), Canadian Institute for Health Information (CIHI).

These datasets were linked using unique, encoded identifiers and analyzed at the Institute for Clinical Evaluative Sciences (ICES).

For information about definitions, data quality & limitations, and selection & preparation of variables, please go to "About the Data" page

CI Confidence Interval; LL = Lower Limit; UL = Upper Limit

H / L / NS Chances are at least 19 in 20 that the rate is higher (H) or lower (L) than the City of Toronto rate (p < 0.05). Rates marked not significantly (NS) different do not reach this level of significance.

* **Rates based on fewer than 20 events are likely to be unstable.**
Reporting with caution if numerator contains 6-19 events OR denominator contains 6-29.

** Rate ratios were created by dividing the local area rate by the City of Toronto aggregate rate.
All unscheduled ED visits that are High Urgency, 2014/15. Data source: National Ambulatory Care Reporting System (NACRS), Canadian Institute for Health Information (CIHI).
These datasets were linked using unique, encoded identifiers and analyzed at the Institute for Clinical Evaluative Sciences (ICES).
